

Install NetBeans 9 or higher

For Introduction to Java Programming By Y. Daniel Liang

Install and configure JDK 11 as described in Supplement I.B. Make sure your JDK 11 is configured correctly. Follow the steps below to download and install NetBeans 9:

1. Download NetBeans 9 from <https://netbeans.apache.org/download/nb90/nb90.html>. Download NetBeans 9 binary from [incubating-netbeans-java-9.0-bin.zip](#). This is a .zip file. Unzip it into a directory called netbeans.
2. Open the netbeans\bin folder and double-click netbeans64.exe. You will be prompted with a dialog box to install nb-javac. Install it. Accept the license. After the installation, it will prompt you to restart netbeans.
3. Follow the simple instructions in Section 1.11 from the book to create a project, a class, and run a class.
4. From now on, every time, to launch NetBeans 9, open the netbeans\bin folder and double-click netbeans64.exe.
